PRODUCT SAFETY

1. **ULTRAR** will not guarantee this product if it is used in conditions other than the parameters outlined in this specifications.
2. Please contact **ULTRAR** to confirm any customer requirements not specified in the specification.
3. Please handle fans carefully. Damage may result from pressure to the impeller, carrying by the lead wires, or dropping fans on a hard surface.
4. The introduction of power, dust water insects or other erosion elements into the hub will result in safety problems or product failure, except in products designed for special environments.
5. Items 1-4, mentioned above, are generally pertinent to our products, and should be a first point of reference.
6. It is very important to establish the correct polarity before connecting the fan to the power source.
7. Avoid operating **ULTRAR** products in environments where poisonous or corrosive elements are present (organic, silicon, cyanogens , formal in phenol, H2S, SO2,NO2,Cl2,etc)
8. Please ensure that fans are stored according to the storage temperature specified. Do not store in a high humidity environment. If fans are stored for more than 6 months, SIYI recommends testing of fans before using.
9. Not all series fans are provided with the lock rotor protection feature. Damage or failure will result from operating fans without this feature, if the impeller for the fan is in any way hindered or impaired.
10. Install fans carefully. Incorrect mounting or installation may result in excessive resonance, vibration and subsequent noise.
11. Safety is a top priority. Please utilize guard accessories to prevent injury to personnel.

12. Unless otherwise noted, all tests are conducted at 25°C ambient temperature, and 65% relative humidity.
13. Any change to the parameters specified in this specification will be determined by mutual agreement between both parties. Parameters not specified will be identical to the final sample approved by your company.
